# Finding the Areas of Parallelograms

To find the area of any parallelogram, including squares and rectangles, multiply the base by the height.

Base  $\times$  Height = Area  
 $5 \times 3 = 15$  square units

1 Multiply the base by the height to find the area of these parallelograms.

<p><b>ex</b></p>  <p>Base <u>  6  </u> Height <u>  2  </u>                      Area <u>  <math>6 \times 2 = 12</math> square units  </u></p>	<p><b>a</b></p>  <p>Base <u>          </u> Height <u>          </u>                      Area <u>                          </u></p>
